BRAND GUIDELINES / V1.3

Doddy.

Your mate in your pocket.

A complete character-led identity system for product, content and motion.

08 OCTOBER 2026 / PRODUCTION DRAFT

A companion with a point of view.

A useful product with a recognisable character, not a generic AI face.

THE PRODUCT

A conversational personal companion designed to help people think, remember, find answers and act on things.

THE CHARACTER

A distinct, human-feeling editorial cartoon who makes assistance approachable without pretending to be human.

ROLE OF BRAND → BUILD FAMILIARITY. EARN TRUST. MAKE UTILITY FEEL PERSONAL.

STRATEGY

Brand essence

Every layer should feel like the same Doddy.

FRIENDLY

Talks naturally, without fake enthusiasm.

CAPABLE

Takes tasks seriously and communicates results clearly.

PLAYFUL

Uses motion and humour as punctuation.

RELIABLE

Makes limits, permissions and outcomes explicit.

POSITIONING

Character first. Utility always.

The character invites attention. The product earns repeat use.

01 DISCOVER

Short-form stories, visual humour, everyday moments.

02 CONNECT

People recognise the face, voice and behaviour.

03 TRY

A clear entry point to voice, translation or help.

04 RETURN

Relevant utility, privacy and trust create habit.

No animated character can substitute for a useful product.

PERSONALITY

The right kind of cheeky.

Not a corporate voice. Not a childish character. Not a know-it-all.

ALWAYS

Clear, curious, conversational, helpful, honest about what has and has not happened.

NEVER

Patronising, misleading, emotionally manipulative, over-familiar, or flippant about serious subjects.

CREATIVE CONCEPT

The controlled imperfection.

The look is built from tension between ink spontaneity and interface discipline.

BLACK INK

Handmade; iconic; high-contrast.

ORANGE SIGNAL

Energy, presence, intent; used selectively.

WARM PAPER

Editorial and approachable.

STRUCTURED UI

Readable, predictable where it matters.

01
Character system

Recognisable in one stroke. Flexible in a thousand moments.

One face. One body language.

The source SVG, not a screenshot, is the canonical character reference.

HEAD	Round, oversized and expressive.
EYES	Two upright black oval marks.
SMILE	Slightly asymmetric ink curve.
BODY	Single gestural pen strokes.
GEAR	Orange backpack and oversized trainers.

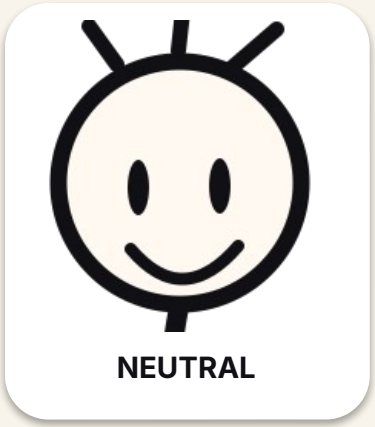

Construction, not decoration.

Controlled proportions preserve recognition across illustration teams.

Face	Centre: 246,149 · radius: 79 (500×600 artboard)
Eyes	Centres x219 / x272 · tall upright ovals
Ink	Body 10–13 units; face outline 11 units
Torso	Neck ~245,232 · hip ~247,352
Shoes	Deliberately oversized, white with orange panels
Accent	Orange on bag, ball and editorial emphasis

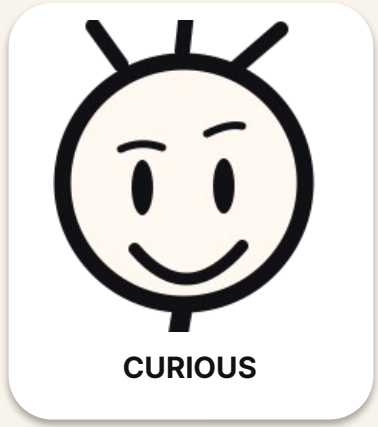

Expressions 1 / 3

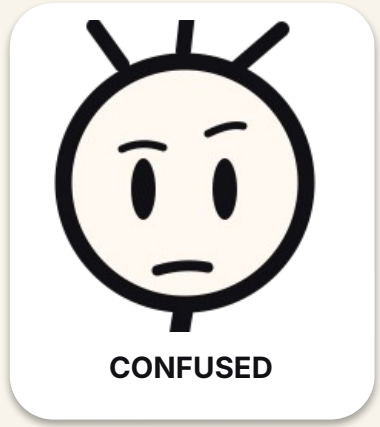

Same core geometry; mood changes via eyes, mouth and limited brows.

WAVE BOTH

HIGH FIVE

GREET

CARRY BAG

Turnaround system

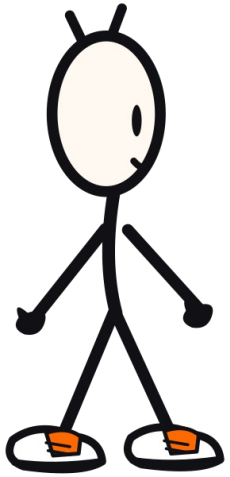

A consistent silhouette from multiple viewpoints.

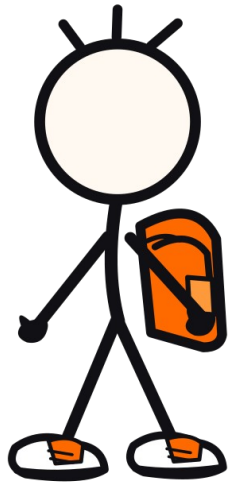

FRONT

THREE QUARTER

SIDE

BACK

The little things matter.

The backpack, basketball and trainers are character clues - not mandatory props.

BACKPACK

BASKETBALL

TRAINERS

Protect recognition.

Make new poses freely. Do not redefine the face.

DO

Keep vertical oval eyes.
Keep the large round head.
Use imperfect rounded ink strokes.
Keep mittens and oversized trainers.
Simplify appropriately at small sizes.

DON’T

Add realistic anatomy or detailed hands.
Replace the face with emoji/robot tropes.
Vary eye geometry dramatically.
Use permanent random orange rays.
Stretch full-body art to tiny UI icons.

Use the right level of detail.

A 24px avatar is not a shrunken full-body illustration.

24–48 px

Simple face mark

64–112 px

Face + minimal accent

160–320 px

Bust or half-body

400 px +

Full figure + accessory

02
Visual identity

Ink, warmth and a bright burst of orange.

A compact, flexible family.

Wordmark, slogan lockup, reversed use and reduced face icon.

PRIMARY + TAGLINE

REVERSED WORDMARK

Give Doddy breathing room.

Minimum safe area: one face-eye width around the wordmark or mark.

PRACTICAL RULES

Keep x-height and underline readable.
Use ink on paper or white on charcoal.
No stretched/skewed variants.
No shadows or gradient outlines.
Outline approved logotype before launch.

No improvising the mark.

A clear brand is built through repetition, not decoration.

AVOID

Stretching the wordmark
Replacing orange with random colours
Adding shadows or strokes
Using logo text as body font
Letting dark mode lose contrast

PREFER

Approved lockups only
Responsive face mark at small sizes
Orange underline used deliberately
Accessible background combinations
Minimum negative space

Distinctive. Restrained. Useful.

Orange is the cue, not the wallpaper.

ORANGE #FF6A00	INK #111115	PAPER #F8F4EB	CREAM #FFF9F1
WHITE #FFFFFF	NIGHT #16171C	GREY #67676B	BLUE #3178C6

Make colour mean something.

Use orange for actions and expression; reserve other accents for information.

Primary action

Doddy Orange / #FF6A00

Primary ink

Ink Black / #111115

Light surface

Warm Paper / #F8F4EB

Dark surface

Night Charcoal / #16171C

Translator state

Companion Blue / #3178C6

Low-priority metadata

Grey / #67676B

Same character, two environments.

Use light by default, dark where context or user preference warrants it.

PAPER

Warm, editorial, readable.

NIGHT

Quiet, rich, still alive.

Playful display. Calm interface.

Typography should speak with personality without compromising readability.

Doddy

DISPLAY / LOBSTER TWO

A quick answer beats a clever screen.

INTER / UI, BODY, DATA AND CONTROLS

Hey!

COMIC NEUE

Small handwritten labels only.

Readable at every size.

Restrained type hierarchy is what makes the cartoon energy work.

DISPLAY	64px / 68px line height	Lobster Two
H1	48px / 52px line height	Inter
H2	34px / 40px line height	Inter
H3	26px / 32px line height	Inter
BODY	16px / 24px line height	Inter
SMALL	14px / 20px line height	Inter
LABEL	12px / 16px line height	Inter

Energy in short marks.

Arrows, motion marks and bubbles are accent vocabulary.

ARROWS

MOTION MARKS

DOODLES

SPEECH BUBBLES

Editorial discipline.

Keep one focal character and one dominant headline per composition.

1 / HERO

One recognisable moment.
One sentence.
Large breathing room.

2 / UTILITY

Conventional navigation.
High-contrast type.
Honest state labels.

3 / DETAIL

Sketches decorate.
Data remains precise.
Avoid excess UI ornament.

A scene, not a sticker.

Place Doddy in a believable action; avoid floating poses without narrative purpose.

STORYTELLING RULES

Establish intent before expression.
Props should support the moment.
Use motion marks to clarify action.
Keep body language legible as a silhouette.
Let whitespace carry the composition.

03
Motion system

A living companion. Never an endless spinner.

Movement explains the state.

Character behaviour is part of UX, not decoration applied afterwards.

CONTINUITY

Doddy shifts; never teleports.

RESPONSE

Listening follows actual input.

CLARITY

Thinking tells users what is happening.

CONTROL

Every action can be interrupted.

ACCESS

Respect Reduce Motion.

RESOLUTION

Success and failure have distinct closure.

Fast where it matters.

Suggested interaction tokens, not hardcoded timing mandates.

120 ms	BUTTON ACK	A small commitment of attention.
240 ms	UI TRANSITION	A card stays spatially connected.
420 ms	CHARACTER GESTURE	Anticipation, follow-through and settle.
680 ms	CHARACTER RESET	Room for physicality, never blocking UI.
720 ms	WALK CYCLE	Illustrative natural cadence.

Status is a promise.

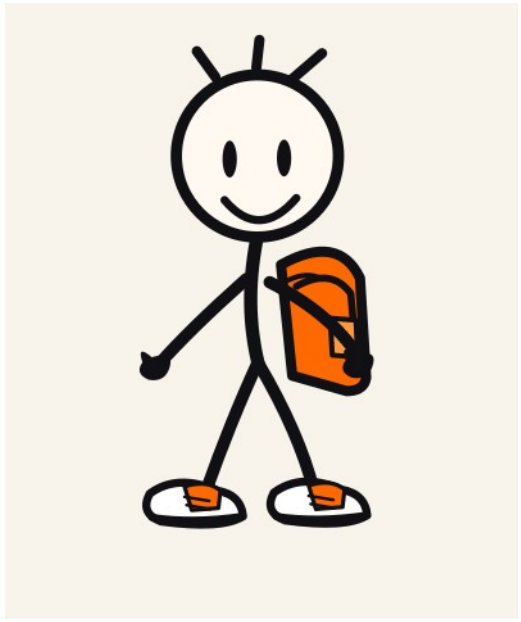

Indicate only states that are actually true and observable.

- IDLE
- INVOKED
- LISTENING
- UNDERSTANDING
- THINKING
- ANSWER / ACTION
- SUCCESS / ERROR

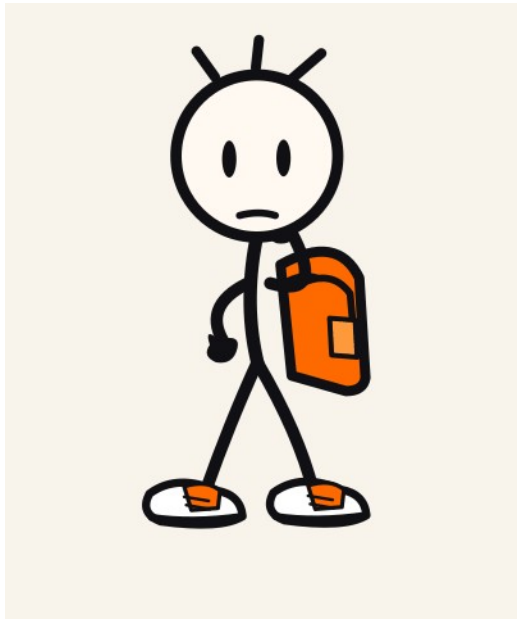

CANCEL / INTERRUPT must work from any active state.

Three storyboard loops.

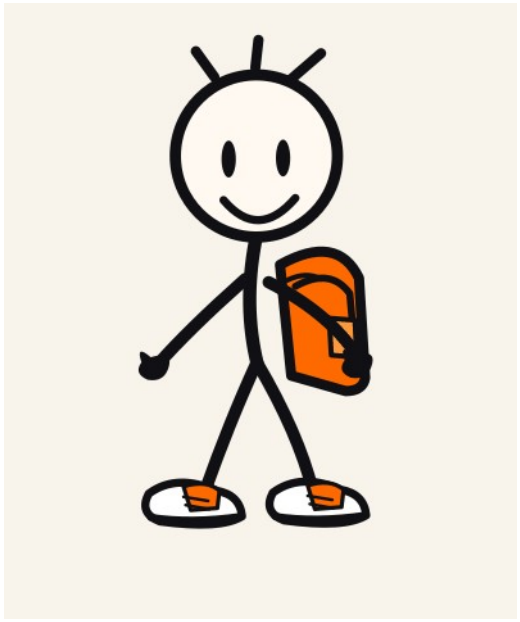

GIF previews demonstrate intent. They are not production Rive or Lottie rigs.

GESTURE

THINKING

CELEBRATE

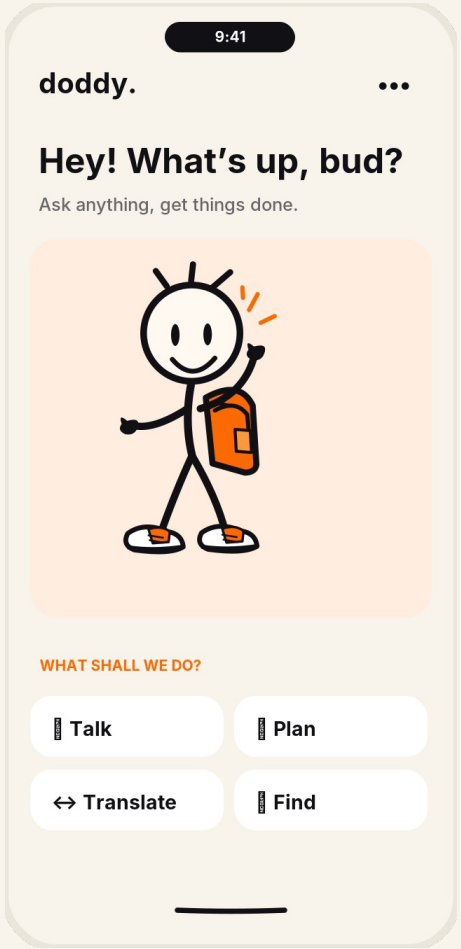

04
Digital applications

Native-feeling utility. Instantly Doddy.

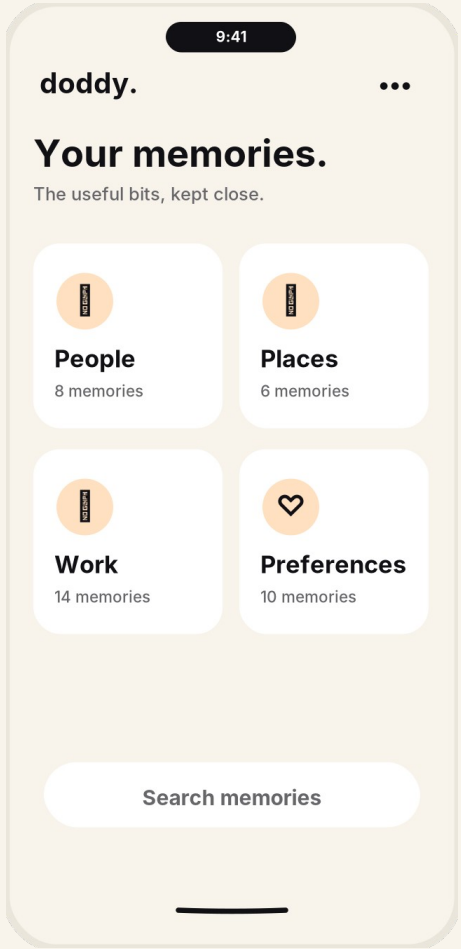

A character who is genuinely useful.

These are design-system mockups, not proof of implemented functionality.

HOME

MEMORY

DARK

Listening is not thinking.

Avoid misleading interface signals: microphone activity must map to actual state.

LISTENING

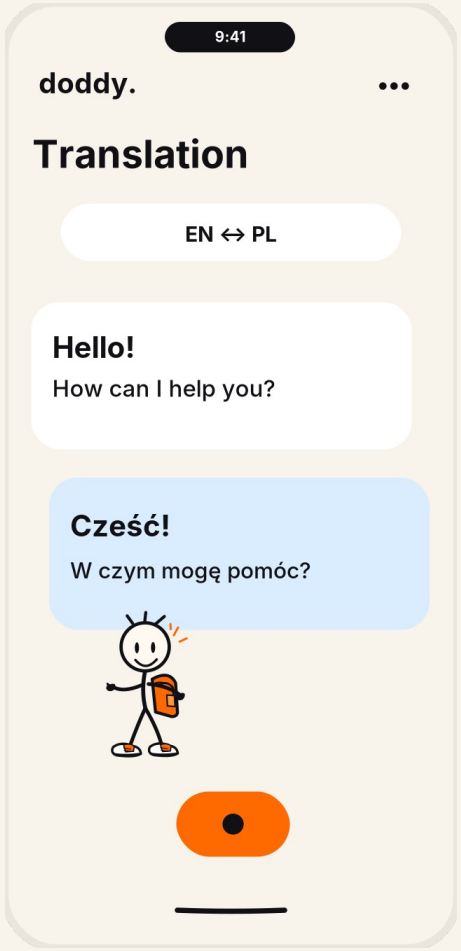

THINKING

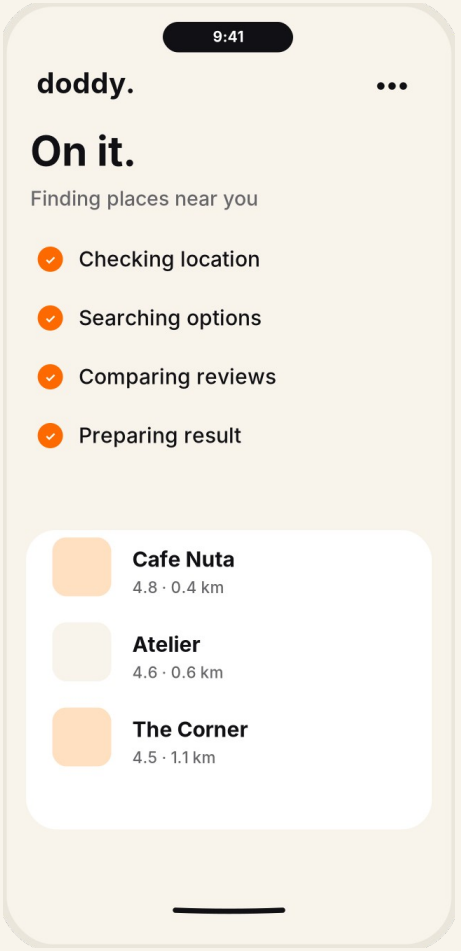

SPEAKING

Helpful states, consistent surface.

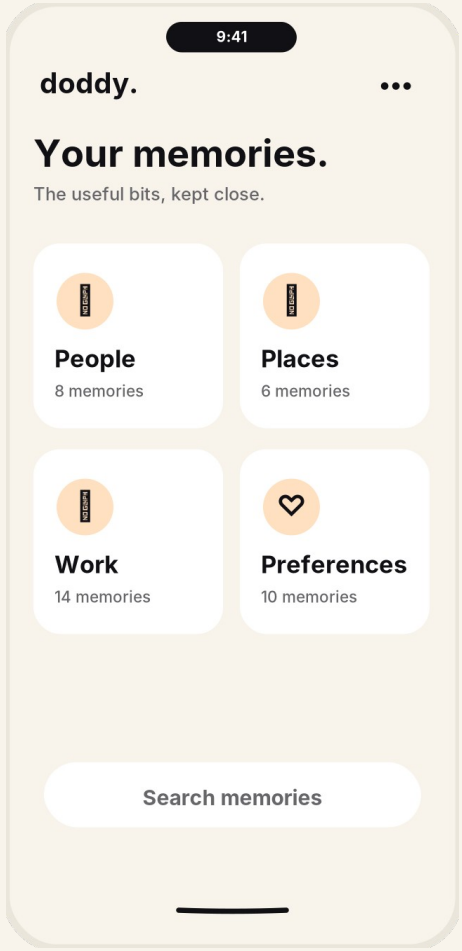

Translation and actions should keep outcome details visible.

TRANSLATE

ACTIONS

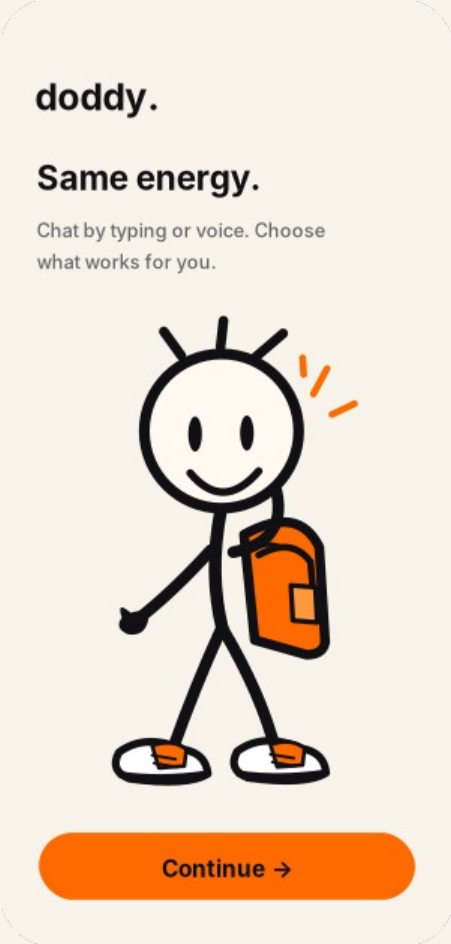

MEMORY

Clarity from the first hello.

Use onboarding to establish utility, input modes and real privacy boundaries.

STEP 01

STEP 02

STEP 03

Be present when useful.

Widget examples are shortcut surfaces; Dynamic Island requires eligible system activity.

PLATFORM GUARDRAILS

No permanent always-on Dynamic Island mascot.
No automatic iPhone Back Tap configuration.
No microphone visuals without a live session.
Use system notifications sparingly.
Provide non-animated equivalents.

05
Content system

The first audience meets a character, not an interface.

One world. Repeatable formats.

Social templates should remain editable and simple to animate.

SOCIAL FRAME 01

SOCIAL FRAME 02

SOCIAL FRAME 03

SOCIAL FRAME 04

Every episode has a small arc.

Don’t write generic AI feature ads starring a mascot.

1. PROBLEM

An ordinary moment the audience understands.

2. REACTION

Doddy has a specific, charming point of view.

3. ACTION

He attempts something real, useful or funny.

4. PAYOFF

A clear resolution, surprise or honest miss.

Built for organic recognition.

Create multiple formats from the same source poses.

SHORT VIDEOS	Character everyday-life sketches; 10–35 seconds.
REACTION CLIPS	One expressive face, one instant point of view.
CAROUSELS	A familiar problem shown across 4–6 frames.
EXPLAINERS	Demonstrate useful product moments without inflated claims.
COMMUNITY	Respond through Doddy, with clear brand voice.

A capable mate, not a know-it-all.

The more sensitive the subject, the less the character performs.

SOUNDS LIKE

“Got it. Here’s what I found.”
“I might be wrong. Want me to check?”
“Want me to take another look?”
“Not sure yet. Here’s what I know.”

DOES NOT SOUND LIKE

“Trust me, I know everything.”
“Done!” before an action succeeds.
Jokes about a serious health issue.
Unsolicited emotional dependence cues.

Personality adapts; principles do not.

Tune expressive level to the situation, not only a settings slider.

EVERYDAY	Short, direct, friendly; occasional humour.
UNCERTAIN	State uncertainty and what evidence would help.
ACTION	Confirm before consequential operations.
ERROR	Own the failure; offer a recoverable next step.
SENSITIVE	Calm, factual, serious; no sarcasm.

06

Production & governance

Files people can actually reuse.

Design for more people.

Test accessibility; do not claim that every screenshot is WCAG verified.

CONTRAST

Check body, button and icon colours against actual surfaces.

MOTION

Respect Reduce Motion; avoid endless attention-catching loops.

TOUCH

Target ≥44×44pt for primary interactive controls on iOS.

SPEECH

Provide transcript and captions for spoken content.

COGNITION

Separate “understood” from “completed” in action flows.

TYPE

Do not put critical UI labels in decorative handwriting.

Don’t fake understanding or memory.

Doddy can feel human without claiming human judgement or omniscience.

TRANSPARENT INPUT

Only indicate “listening” during active authorised audio capture.

Explain what context is being used.

Give simple permission controls.

Do not imply access to closed apps or screens.

TRANSPARENT OUTPUT

Differentiate suggestion from executed action.

Show source/time limitations where relevant.

Mark memory as explicitly saved when it is.

Support recovery from failures.

A small system that scales.

Machine-readable starting tokens are included in JSON, alongside CSS-style names.

--doddy-orange	#FF6A00
--doddy-ink	#111115
--doddy-paper	#F8F4EB
--doddy-night	#16171C
--radius-card	24px
--motion-character	420ms

Find it. Inspect it. Reuse it.

SVG sources are independent vector compositions; PPTX text is editable.

Character master	doddy_master_front.svg
Expression	doddy_expression_<emotion>.svg
Pose	doddy_pose_<action>.svg
App icon	doddy_app_icon_1024.png
App screen	doddy_ui_<state>.svg
Motion preview	doddy_motion_<state>_preview.gif

A real system needs checks.

Before publishing or handing to engineering:

ART

Check proportions across artboards and dark background.

FORMATS

Verify SVG renders, PNG alpha, GIF playback and ZIP integrity.

DOCUMENT

Review PDF visual output and editable slide copy.

TRADEMARK

Search for conflicts, clear naming and approve final outlined lettering.

FONTS

Verify license conditions before commercial publishing.

PRODUCT

Validate platform constraints, accessibility and technical feasibility.

What v1.3 is - and isn’t.

Transparent production status prevents expensive downstream assumptions.

DELIVERED

Vector character art and expressions.
Vector pose and turnaround system.
Logo and colour source files.
Editable presentation + PDF.
Social/app vector mockups.
Motion preview GIFs + specs.

NEXT PRODUCTION WORK

Custom outlined final wordmark.
Trademark and font legal review.
Dedicated animator cleanup/rig.
Platform-validated app interactions.
Accessibility testing on real UI.
Production asset optimisation.

Good work.

Your mate in your pocket.

DODDY / BRAND GUIDELINES v1.3

Source art. Design tokens. Product examples. Motion.
